

JOB VANCANCY ADVERTISEMENT

Background

Building Data Science capacity is a key priority for the Government of Rwanda, the Ministry of Health and the Rwanda Biomedical Center (RBC), and is a focus of the ACTIVATE project to enhance clinical research and data science in Sub Saharan Africa. With a focus on sub-national clinical research centers, the aim is to bolster capabilities for evidence-based decision-making and attract clinical trial opportunities. We are seeking a consultant to strategically collect and analyze data as evidence to inform the development of priority sub-objectives for implementation of capacity-building programming areas the Data Science domain of ACTIVATE

Position: Consultant for Data Science Capacity Assessment

Job description

The appointed consultant will strategically collect and analyze data to inform the development of priority sub-objectives in data science capacity building. This entails synthesizing evidence to shape Rwanda's Investment Case for implementing ACTIVATE Africa programming in the data science domain.

Duties / Responsibilities/ Scope

Activities may include document reviews, key-informant interviews, gap analysis, and others to analyze the Platform, Process and Technologies capacities within the Data Science ecosystem in Rwanda. The consultant will produce a report that synthesizes evidence generated at the national-level, and sub-national level for each health ff applying the PPT framework and describes priority areas for capacity-building programming in Rwanda and the activities that would be needed to achieve programming objectives within each of these priority areas identified.

Requirements – Abilities, Skills, and Knowledge

- MSc or PhD in Biostatistics, Data Science, Epidemiology or related field
- Expertise in data science
- Proficiency in research methodologies
- Experience in policy analysis
- Strong analytical skills
- Knowledge of Rwanda's healthcare system
- Ability to synthesize complex information into actionable recommendations
